**THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

**THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

### HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:
2. The examiner considered the Applicant's Amendment filed on 10-22-2009 and after updated search, no other prior art of record has taught that which was presented in the amended claims
3. Therefore, claims 2, 6-9, and 13-23 are allowable.
4. Independent claims 2 and 9, when considered as a whole, are allowable over the prior art of record (Yoshida, Nakayama, and Arakawa). Yoshida teaches a method and electronic map apparatus (vehicle-mounted navigation apparatus). The apparatus has media storing map data to be displayed as a map. See col. 3, lines 22-30, which describes how the display control unit reads (fetches) the map data. Yoshida describes a display device (Fig. 1; 11) for displaying the map in accordance with the map data. The display control unit (microcomputer) processes the map data and scale indication patterns, which is an equidistant curve from a center at a specified point (location of the vehicle) on the map and links points on the map at a constant distance corresponding to actual road distances (col. 2, lines 13-30) from the center equal to those on the map. When the map is displayed on the display device, the circles are displayed on the basis of the circle's display data processed by the microcomputer (display control unit) being superimposed on the map displayed on the display device. See Fig. 3 and col. 4, lines 12-28. Also, see col. 3, lines 39-51, which describe how the display control unit (microcomputer) reads (processes) and superimposes the scale indication pattern on the road map screen in accordance with the position of the vehicle. Thus, the circles

are processed such that they are centered around the position of the vehicle. Yoshida teaches that the display control unit (microcomputer) processes data of a plurality of circles representing different geographical distances from the center and the circles are superimposed on the map displayed. See Fig. 3, which shows circles representing distances of 1, 2, and 3 km. Also, see col. 4, lines 12-28. Yoshida further shows that the display control unit (microcomputer) outputs numbers (1, 2, 3) indicating a geographical distance from the center to the circle and displays each of the numbers in close proximity to the circumference of the circle with the geographical distance thereof indicated by the number. See Fig. 3. Yoshida further teaches, in column 3, lines 55-66 and in figure 4, displaying the characters representing a distance from a center point in a running direction of the vehicle. Furthermore the symbols [16-19] of Figures 2-4 represent four different directions of the map, they are symbols that represent different directions (see column 3, line 67 through column 4, line 11). Yoshida still further teaches that the display control unit (microcomputer) changes contraction of a map (with regard to claim 9) displayed on the display device and modifies the geographical distances from the center to the circles and the number of circles in accordance with a degree of contraction of the map. See the Reduce (20) and Magnify (21) buttons in Fig. 3 and col. 4, lines 4-12, which describe how the reduction of scale is handled. For example, if the Magnify button is pressed to magnify the map by a factor of 2, then only the circles representing 1 and 2Km will be displayed (2 circles instead of 4). Also, see col. 5, lines 4-30, which describe changing the scale and scale indication patterns (i.e. geographical distance representations). Yoshida further teaches displaying a cursor

[12] indicating the center of the plurality of arcs where a vehicle is located and allowing for scrolling across the display (see column 3, line 55 through column 4, line 28 and figure 3). Yoshida is supplemented by Nakayama who further teaches a vehicular navigation system and further teaches the user viewing the map in a perspective view and a map view (see column 6, lines 25-27, in column 1, line 66 through column 2, line 6 and column 22, lines 49-50), and further teaches the map being displayed with different areas, between concentric lines, being represented with different colors (see column 15, lines 12-25 and lines 52-67). Nakayama teaches using a plurality of arcs that represent a distance from a central point (see column 15, lines 22-25), superimposed over a map (see column 6, lines 16-26 and column 15, lines 12-19), displayed in a perspective view (see column 22, lines 49-50). Yoshida and Nakayama are further supplemented by Arakawa who further teaches a system for vehicular navigation where a vehicle position is marked (see column 9, line 39 through column 10, line 9 and figure 11), similar to that of Yoshida and Nakayama, but further teaches displaying an indicating mark "+" in the center of the map screen during scrolling of the map (see column 10, lines 10-54).

However, specifically the prior art of record fails to clearly teach or support the limitations of *a electronic map method and apparatus that selectively, upon user input, superimposes a display of concentric ellipses around a center vehicle/cursor, where the distance between arcs corresponds to actual road distances; the arcs partitioning the map into rings of different colors, and are separated by a highlighted or shadowed arc displaying a corresponding distance marker.*

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
